- (2) The building employs environmentally conscious cleaning and sanitation practices.
- (3) The building's large natural ventilation openings contribute to tenant well-being and comfort.
- (4) The building promotes biodiversity with consideration for the local vegetation and species diversity.
- (5) The building implements measures to address and mitigate natural disaster risks.
- (6) The building offers convenient access to and promotes the use of public transportation.

3. CASBEE Overview

CASBEE evaluates and rates buildings' environmental performance based on their energy and resource efficiency, recycling activity, environmental load, and aesthetic appeal.

The CASBEE certification is a rating system that measures the impact of environmentally-conscious buildings on real estate value. It evaluates existing buildings that have been completed for more than one year based on multiple environmental performance evaluation categories. Based on the total score, buildings are ranked on a four-grade scale (from highest to lowest): S, A, B+, B.

CASBEE Environmental Performance Evaluation Categories

- a. Energy/greenhouse gas
- b. Water
- c. Materials
- d. Biodiversity/sustainable site
- e. Indoor environment
